SUMMARY

Fullstack Developer with over 3 years of experience, building robust, performance-oriented web solutions, with a strong specialization in backend development (Laravel and Python) and orchestrating environments with Docker and AWS. Currently at Prontomed, migrating a legacy system from plain PHP to Laravel with automated tests; previously architected financial integrations, e-learning platforms, and Artificial Intelligence agents for process automation via WhatsApp.

SKILLS

Proficient: PHP, Laravel, Livewire, Python, FastAPI, Django, Node.js, JavaScript, Vue.js, React.js, MySQL, PostgreSQL, MongoDB, Pest, Redis, Docker, Docker Swarm, AWS (EC2, RDS, S3), CI/CD, Git

PROFESSIONAL EXPERIENCE

Fullstack Developer
Aug 2026 – Present

Prontomed Planos de Saúde

- Leading the migration of the SOL Solução Ocupacional occupational health and safety system from **plain PHP to Laravel**, implementing **automated tests with Pest** (absent from the original system) run in **Docker**, with a CI/CD pipeline under development.
- Evolving occupational data modules, including **PGR** and event submission to **eSocial**; planning the replacement of cron routines with **Laravel Jobs (Horizon + Redis)**.

Fullstack Developer (Mid-level)
Dec 2025 – Jul 2026

JMV Technology

- Built from scratch, from the business rules provided, the **JMV Play** project — an online event sales platform with **Laravel + Octane (FrankenPHP)**, **PostgreSQL**, and **React.js**.
- Omnichannel messaging with **Chatwoot** and creation of **Artificial Intelligence agents** for financial-sector process automation, with emphasis on automated generation and delivery of invoices and payment reminders via WhatsApp to accounting offices.

Fullstack Developer (Junior)
Feb 2023 – Dec 2025

JMV Technology

- Creation of RESTful APIs, implementation of **JWT** authentication and payment integrations with **Stripe**, **PayPal**, and **Cora** (integrated with WHMCS).
- Development and maintenance of an **e-learning platform** with **Laravel**, **Livewire**, and **Vue.js**, including assessment and automated certification modules.
- Optimization of queries and legacy Laravel APIs, validated with load tests.
- Python scripts for automation and video migration, reducing manual operational effort.
- Infrastructure migration from cPanel to **Docker Swarm** with a continuous deployment pipeline and zero downtime.

IT Support Specialist
Feb 2020 – Feb 2023

JMV Technology

- Specialized technical support for streaming platform clients (**Wowza**).

EDUCATION

Bachelor's Degree in Computer Engineering
UEMG · Divinópolis
Mar 2018 – Feb 2025 · Completed

CERTIFICATES
